2023 - 2025	<ul style="list-style-type: none"> In 2023, it was the first year that the Company had the report of Greenhouse Gas emissions, so TTCL will continue to collect data to view Carbon Footprint Organization statistic for approximately 3 years in order to determine the average and set goals for reducing the amount of Greenhouse Gas emissions organization. However, TTCL expects to be able to reduce Greenhouse Gas emissions by 5% per year, which will be done by using 2023 as the base year. At the same time, the company will join the project with the Stock Exchange of Thailand: Care the Bare and various projects of The company itself, such as Save Energy Project.
